WORK MODE

Remote

TECHNICAL SKILLS

BACKEND

Python: Django, Django REST Framework, **FastAPI**, Celery, Channels (WebSockets), SQLAlchemy/SQLModel. **PHP** (Symfony), Java. REST and GraphQL APIs, microservices, Stripe payments.

DATABASES

PostgreSQL, MySQL, Oracle, Redis, SQLite. Relational modeling, query optimization, migrations (Django, Alembic), multi-tenancy.

DEVOPS

Docker (Compose, Swarm), **GNU/Linux**, Nginx, GitHub Actions, Jenkins, Git, MinIO (S3), Grafana.

AI AND AUTOMATION

Claude and OpenAI APIs, MCP servers, vector search (Pinecone), n8n, Make. Daily development with Claude Code and Copilot.

FRONTEND AND MOBILE

JavaScript, HTML5, CSS3, Bootstrap, HTMX, ExtJS. Mobile apps with **Flutter/Dart**. Firebase.

HOW I WORK

Architecture and module design, requirements gathering, testing (pytest), code review, technical documentation, Scrum/Kanban, web security (OWASP).

ABOUT ME

Computer Science Engineer with 9+ years building complete web and mobile applications, from the database to the user interface. My strength is the backend with **Python (Django, FastAPI)** and **PostgreSQL/MySQL**; on the frontend I work with JavaScript, HTMX and Bootstrap, and I build mobile apps with **Flutter**.

I have delivered projects end to end in retail, eCommerce, logistics, payments and accounting: I design the architecture, build the APIs and the screens, deploy with Docker and CI/CD, and maintain it all. In recent projects I integrate large language models (Claude, OpenAI) into real products. Looking for a remote full stack role.

WORK EXPERIENCE

Freelance / client projects

2025 - present

FULL STACK DEVELOPER

- Multi-branch business management system (POS, inventory, purchasing, transfers, cash register, receivables) with Django, DRF, PostgreSQL, Celery and Redis, deployed on Docker.
- Multi-tenant platform with Django, Channels and Celery that orchestrates AI agents; CI/CD with GitHub Actions and deployment on Docker Swarm.
- Microservices with FastAPI and Django (error logging with API key auth, notifications, PDF generation) with Jenkins and GitHub Actions pipelines.
- Business plan generator built on the Claude API that delivers a PDF by email, with Stripe payments.
- Remittance and payments backend (Django, MySQL, Firebase) and online store backend (FastAPI, SQLAlchemy, WebSockets).
- Point-of-sale app in Flutter for Android.

Supermarket 23 (TREEW)

2022 - 2025

BACKEND DEVELOPER, SOFTWARE ARCHITECT

- Owned the architecture and backend development of the retail and eCommerce platform.
- Module design, data modeling and code review for the team.

Cubacation / EVORAS.SURL

2022

BACKEND DEVELOPER

- Development of eCommerce platforms.
- Development of accounting management systems.

STRENGTHS

I work well with non-technical clients: I turn what they ask for into something that can be built.

I deliver a module end to end without needing hand-holding.

I mentor less experienced developers and review their code.

I learn whatever is needed: almost every project has brought me a new technology.

EDUCATION

B.Eng. in Computer Science

University of Informatics Sciences (UCI), Havana / 2016

COURSES

Web Application Penetration Testing (UCI, 2020)

Advanced GNU/Linux Administration (UCI, 2018)

Symfony 2 (UCI, 2017)

Web Application Development with Drupal (UCI, 2017)

LANGUAGES

Spanish (native)

English (intermediate)

University of Informatics Sciences (UCI)

Sep. 2018

ANALYST - DEVELOPER

- Requirements gathering with clients and technical support.
- Test case design and implementation.

Enterprise Computerization Center - UCI

2016

LEAD DEVELOPER

- Development with Python, Django, ExtJS, Symfony, WordPress and PostgreSQL.
- Oracle database design and administration.
- Server administration and SOA services development.

University of Granma

Nov. 2015 - Jun. 2016

DEVELOPER

- Web application development with Python, Django, JavaScript and HTML5.
- Desktop application development with Python and PyQt.
